

MONARFLEX® Net

- for short-term and light projects

Five good reasons to choose MONARFLEX® Net:

-  Uniform quality in every delivery
-  Local stocks throughout Europe
-  Only one supplier for sheeting is necessary
-  Easy to install
-  Broad product range with products for all purposes

Setting the standard

MONARFLEX® is setting the standard in scaffold sheeting

Technical data

Available sizes	Colour	Gross weight g/m ²	Roll weight	Number of fixation stitches	Tensile strength
MONARFLEX® Net 50					
2,50 x 50M	green	50 g/m ²	8 kg	3	3,5 kN/m
3,00 x 50M			9 kg		
4,00 x 50M			12 kg		
MONARFLEX® Net 100					
2,50 x 50M	green	100 g/m ²	13,5 kg	3	7 kN/m
3,00 x 50M			15,5 kg		
MONARFLEX® Net 100 Flamesafe					
2,50 x 50M	white	104 g/m ²	14 kg	3	7 kN/m
3,00 x 50M			16 kg		

Features

MONARFLEX® Net 50 and Net 100 are products from the broad MONARFLEX® product range. The nets are made of UV stabilized High Density Polyethylene (HDPE) with extra stitches to strengthen the fixation to the scaffold. Each roll is reeled onto a cardboard core for easy application and wrapped individually in a clear film for protection.

MONARFLEX® Net 100 Flamesafe is a flame retardant net preventing flames to spread in case of a fire. It conforms to DIN 4102 ; B2

Durability

We recommend you to use MONARFLEX® Net for short-term projects in very mild weather and on building sites where light work is carried out. The net will - if fixed properly - protect pedestrians from falling objects from the scaffold.

Should you have more long-term projects where you want to protect the environment and the health & safety of the worker on the scaffold as well, we recommend other reinforced products from our product range.

Application

MONARFLEX® Net is usually applied vertically. The reinforcement stitches placed on each side and one in the middle ensure a firm attachment to most standard scaffold systems. Fixation can be made with strips.

MONARFLEX® Product range

Monarflex® is one of the worlds leading producers of reinforced scaffold sheeting. The MONARFLEX® product range includes products for all types of building projects in any type of weather. Please contact us for further details.
