

# MONARFLEX® Light

- for protection of workers, environment and equipment

## Five good reasons to choose MONARFLEX® Light:

-  Unique eyelet fixing system
-  Top quality in all components
-  Durable weather protection
-  Local stocks throughout Europe
-  A broad fixing accessory range

*Setting the standard  
MONARFLEX® is setting the  
standard in scaffold sheeting*

# Technical data

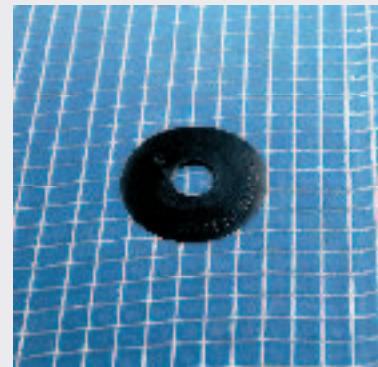

Available sizes	Colour	Gross weight	Roll weight	Tensile Strength	Eyelet Pull-out Strength	Tear Strength
<b>MONARFLEX® Light</b>						
2,25 x 36M	transparent	180 g/m <sup>2</sup>	14,6 kg	>7,5 kN/m	386 N	210 N
2,75 x 30M			14,9 kg			
3,25 x 36M			21,1 kg			
4,00 x 36M			25,9 kg			
<b>MONARFLEX® Light Flamesafe</b>						
2,25 x 36M	white	200 g/m <sup>2</sup>	16,2 kg	>7,5 kN/m	>386 N	>200 N
3,25 x 36M			23,4 kg			
4,00 x 36M			28,8 kg			

## Features

MONARFLEX® Light is a product from the broad MONARFLEX® product range. The composition of the product is a strong 12x12 mm reinforcement grid in 1100 dtex Polyester yarn protected by 2 layers of Low Density Polyethylene (LDPE) with UV stabilization.

With the use of these components, we have designed a product that is thinner, lighter and yet stronger than other competitive products.

The unique black eyelet system is part of a safe fixation system with better properties than corresponding banded products. The eyelet system is placed in patterns to fit most standard scaffold systems.

## Durability

We recommend you to use MONARFLEX® Light for medium term projects up to 6 months duration.

The sheeting can be used for temporary covering of scaffolds or other objects that needs to be protected from either the weather or other mechanical influences. The sheeting is suitable for the more stable weather conditions without any storms where higher strength is required.

## Application

MONARFLEX® Light can be applied both vertically and horizontally. The eyelets form a system that suit most standard scaffold systems. Fixing the sheeting to the scaffold must be done according to calculations taking factors like wind, building season and height of the surrounding buildings into consideration. We recommend the use of 1 fixing/m<sup>2</sup> but any fixing must be placed according to calculations for each project.

## MONARFLEX® Product range

Monarflex is one of the worlds leading producers of reinforced scaffold sheeting. The MONARFLEX® product range includes products for all types of projects in all type of weather. Please contact us for further details.
