

MONARFLEX® Super T Plus

- for rough weather conditions and long-term use

Six good reasons to choose MONARFLEX® Super T Plus:

-  Unique eyelet fixing system
-  For tough and extreme working and weather conditions
-  Hurricane proof
-  Protects workers and environment
-  Local stocks throughout Europe
-  A broad fixing accessory range

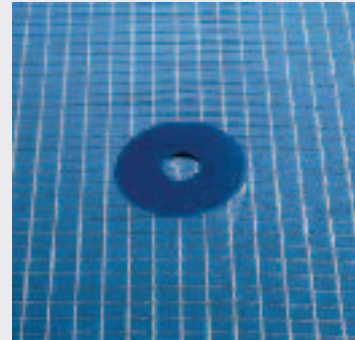

*Setting the standard
MONARFLEX® is setting the
standard in scaffold sheeting*

Technical data

Available sizes	Colour	Gross weight	Roll weight	Tensile Strength	Eyelet Pull-out Strength	Tear Strength
MONARFLEX® Super T Plus						
2,25 x 40M	transparent	240 g/m ²	21,6 kg	>13 kN/m	838 N	265 N
3,00 x 45M			32,4 kg			
3,25 x 36M			28,1 kg			
4,00 x 36M			34,6 kg			
MONARFLEX® Super T Plus Flamesafe						
2,25 x 40M	white	255 g/m ²	23 kg	>13 kN/m	923 N	234 N
3,00 x 36M			34,4 kg			
4,00 x 36M			36,7 kg			

Features

MONARFLEX® Super T Plus is the strongest product from the broad MONARFLEX® product range. The essence of this product is the strong 9x12 mm reinforcement grid in 1670 dtex Polyester yarn protected by 2 layers of Low Density Polyethylene (LDPE) with Plastomer and UV stabilization. With the use of these components, we have designed a product that is thinner, lighter and yet stronger than other competitive products. The unique blue eyelet system are a part of a safe fixation system with better properties than corresponding banded products. The eyelet system are placed in patterns that fit most standard scaffold systems.

Durability

We recommend you to use MONARFLEX® Super T Plus for all types of long-term projects exceeding 12 months. The product is designed for extreme weather conditions like hurricane forces. The combination of high quality components form a tough and durable sheeting for very rough and extreme working conditions ex. sandblasting and water-jetting. Using MONARFLEX® Super T Plus, you can meet deadlines and avoid economical surprises regardless of the weather.

Application

MONARFLEX® Super T Plus can be applied both vertically and horizontally. The eyelets form a system that suit most standard scaffold systems. Fixing the sheeting to the scaffold must be done according to calculations taking factors like wind, building season and height of the surrounding buildings into consideration. We recommend the use of 1 fixing/m² but any fixing must be placed according to calculations for each project.

MONARFLEX® Product range

Monarflex is one of the worlds leading producers of reinforced scaffold sheeting. The MONARFLEX® product range includes products for all types of projects in all type of weather. Please contact us for further details.
